# IRINA DUMAN

## CONTACTS

Tbilisi, Georgia
ipduman@gmail.com, +995-599-617-404

## WORK EXPERIENCE

### AQA Engineer                                                   01.03.2022 - 01.03.2024
LAD

In Lad I worked on automating UI and API tests for 3 independent projects.

Besides my daily responsibilities I also managed to achieve the following:
* Successfully introduced Playwright framework as a replacement for
CodeceptJS, as a result, we managed to reduce the amount of time required
to write and support tests, which in turn, resulted in the company saving
money and time.
* Created new CI/CD pipelines for Playwright and successfully integrated it
with TestIT (a TMS used by the company) and GitLab.
* Created a series of learning materials and demos for our test department to
spread Playwright's knowledge, helping other people adopt the new
approach. I also conducted a series of workshops and pieces of training for
people willing to learn more about the auto-testing craft.

Experience in mobile testing with Detox and Typescript.

### Junior Quality Assurance                                      Aug 2018 - June 2021
Momino

During this priod I've been working as a QA for a small local startup helping families to organize their lives
better.
* Helped to prepare test plans and identified testable parts of the future application.
* Performed manual tests and provided developers with an accurate feedback.
* Conducted a continuous review of unit and integration tests written by developers.
* Helped to write simple UI tests using Selenium (Python).

## EDUCATION

### Faculty of Economics                                          Sep 1998 - Jun 2003
Humanitarian University of Russia (Moscow)
Master of Economics

### Manual Testing                                                Jan 2022 - May 2022
Vadim Ksendzov's course.

# QUALIFICATIONS

Understanding of testing theory and ability to apply it in practice.
Creation/maintenance of test documentation.
Knowledge of TypeScript, JavaScript.
Knowledge of HTML, CSS, XML.
